About: Protec Space-Tech Equipment Vest

A 3rd Generation Tactical Equipment Vest combines an advanced vest design with lightweight spacer material technology. The layered spacer construction creates pockets of air that help regulate temperature, provide padding and allow moisture to disperse while promoting airflow around the body.

The vest incorporates quick-release fittings with self-levelling locks, making it easy to put on and remove while providing a secure and adjustable fit. The one-size-fits-most design provides versatility for different users.

Designed for police officers, security professionals and dog handlers, the DU5T features Tetra-compatible Klick Fast shoulder docks and ergonomically positioned equipment panels for practical access to essential equipment.
