

PROTEC

PROTEC X2 LOW PROFILE HOLSTER

Code: X2TN

Fabric: 1000D Nylon

Weight: 50g

Colour:

Black

About the X2TN:

The Protec X2TN Low Profile Holster is designed to provide discreet, secure carry for the Taser X2. Combining durable 1000D ripstop nylon with 4mm neoprene, it offers a low-profile design with a close-fitting construction that conforms to the shape of the device.

The neoprene material helps provide a secure fit while minimising bulk, making the holster suitable for approved covert and plain-clothes applications. Its dual belt loop design allows the holster to be positioned in either a high or low carrying position, offering flexibility to suit individual preferences.

Available in right-hand and left-hand configurations, the X2TN is designed exclusively for the Taser X2.

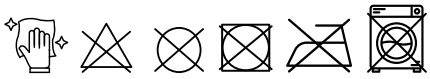

Features:

- Low-profile design for discreet carry
- Durable 1000D ripstop nylon construction
- 4mm neoprene for a close-fitting, conforming design
- Dual belt loop system for adjustable high or low positioning
- Available in right-hand and left-hand variations
- Designed exclusively for the Taser X2
